

BHARATH KUMAR REDDY PAMIREDDY

Senior DevOps / Platform Engineer | DevSecOps | SRE & Observability

Abu Dhabi, UAE | +971 50 275 4631 | pbkreddy7799@gmail.com

[LinkedIn Profile](#) | [Portfolio Website](#)

PROFESSIONAL SUMMARY

Senior DevOps and SRE engineer with 8+ years of hands-on experience across cloud-native, hybrid and on-premises environments. Currently responsible for the reliability, performance and security of mission-critical workloads at ADNOC in Abu Dhabi, spanning AKS, Azure App Services, serverless and VM-based infrastructure. Day-to-day work covers observability engineering with Prometheus, Grafana and Dynatrace; GitOps continuous delivery with Argo CD (hub-spoke) and Kargo; platform engineering with Backstage and Crossplane; and infrastructure automation with Terraform, Bicep and Azure DevOps. Known for turning slow manual processes into self-service automation - product and customer onboarding cut from days to minutes, zero-downtime Kubernetes upgrades, and cloud costs made predictable through FinOps practices and OpenCost.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AKS, App Services, Functions, IaaS/PaaS, Key Vault, Azure Monitor), AWS (EKS, EC2, S3, IAM, CloudWatch), GCP (GKE), VMware vSphere/ESXi, Hyper-V, hybrid and on-premises data centres

Observability & Monitoring: Dynatrace, Prometheus, Grafana, Azure Monitor, Log Analytics (KQL), CloudWatch, ELK/Kibana, Zabbix; APM, log analytics, dashboards, alerting and Observability-as-Code; familiarity with Splunk, AppDynamics, Datadog

Site Reliability Engineering: SLO/SLI design, capacity planning, incident response, RCA, MTTR optimisation, resilience testing, canary and blue/green deployments

CI/CD & GitOps: Azure DevOps (YAML pipelines), GitHub Actions, Jenkins, GitLab CI, Harness, Bitbucket; Argo CD (hub-spoke), Kargo artifact promotion, Backstage (IDP)

Infrastructure as Code: Terraform, Ansible, Azure Bicep, ARM Templates, CloudFormation, AWS CDK, Crossplane, Helm, Packer, SaltStack, Vagrant

Containers & Orchestration: Kubernetes (AKS, EKS, GKE), Docker, Podman, Containerd, Helm, Kustomize, OpenShift, Rancher, Karpenter, Dapr, ACR/ECR

DevSecOps: Fortify SAST/DAST, SonarQube, Black Duck SCA, CodeDX, Semgrep, Gitleaks, Prisma Cloud, OPA/Kyverno; HashiCorp Vault & Boundary, Azure Key Vault, KMS; Microsoft Entra ID, Managed Identities, RBAC, Zero Trust

Scripting & Automation: Python, Bash, PowerShell, REST API integration, Azure CLI, AWS CLI, Power Automate, ServiceNow integration

FinOps & Cost: OpenCost, right-sizing, autoscaling (HPA/VPA/node pools), storage lifecycle management, cost governance

OS, Networking & ITSM: RHEL, Ubuntu, Windows Server, Active Directory; TCP/IP, DNS, VPN/IPSec, load balancing; ServiceNow, ITIL, Agile/Scrum, SAFe

PROFESSIONAL EXPERIENCE

ADNOC Group - Abu Dhabi National Oil Company

Abu Dhabi, UAE

Senior DevSecOps Engineer (Contractor)

May 2025 - Present

- Own observability and reliability of enterprise workloads on AKS, Azure App Services, Functions, IaaS and on-premise VMware/Rancher Kubernetes estates - dashboards, alerting and SLO/SLI instrumentation across the stack.
- Stood up the enterprise monitoring stack (Prometheus, Grafana, Dynatrace) for production and pre-production estates with APM, log analytics and alert routing; **measurably improved MTTR and reduced repeat incidents.**
- Designed end-to-end Azure DevOps YAML pipelines with canary rollouts and automated rollback; GitOps delivery to AKS via **Argo CD hub-spoke with Kargo promotions** - release and onboarding cycles cut **from days to minutes.**
- Built **Backstage IDP self-service workflows** - a zero-ticket model onboarding products and single/multi-tenant customers **in minutes instead of days**, significantly improving developer productivity.
- Automated infrastructure with Terraform, Bicep, ARM and **Crossplane** - idempotent, reusable provisioning under standard governance, with cost made predictable for product owners via **OpenCost.**
- Executed **zero-downtime Kubernetes upgrades (1.28 to 1.34)** including workload apiVersion migrations; engineered HPA, VPA and node-pool autoscaling for reliable load handling.
- Built **self-hosted Azure DevOps agents** with custom hardened container images (DHI) on AKS, powering security scanning and CI/CD without shared public runners.

- Embedded shift-left DevSecOps (Fortify SAST/DAST, SonarQube, Black Duck SCA, CodeDX, container scanning) into release pipelines as enforced security and compliance gates.
- Automated Azure DevOps access management across **multiple organisations** - access provisioned in minutes; Power Automate daily reporting of offline agents plus Dynatrace pipeline status monitoring.
- Manage secrets, TLS certificates and identity with Azure Key Vault and Microsoft Entra ID - service principals, Managed Identities and RBAC aligned to governance and audit standards.
- Authored CI/CD standards, observability playbooks and onboarding runbooks used as the engineering baseline.

NTT DATA Services

Bengaluru, India

DevOps and Cloud Engineer

Oct 2020 - Apr 2025

- Onboarded enterprise clients onto Azure, AWS and GCP - secure landing zones, VPN/Interconnect connectivity, IAM hierarchies and resource baselines.
- Supported client **GMF for ~5 years across North America, South America and Europe** - owning cloud operations and FinOps with predictable, tracked spend.
- Cut **EKS compute cost ~6x** through planned runtime scheduling, cleanup of unused resources and right-sized autoscaling.
- Built and maintained CI/CD across Azure DevOps, Jenkins, GitLab CI and GitHub Actions; managed GitOps Kubernetes releases with Argo CD, syncing Helm charts and manifests from Git to cluster.
- Ran containerised platforms on AKS, EKS and GKE with Docker, Kubernetes and Helm - improving deployment efficiency and reliability across customer engagements.
- Authored reusable Terraform modules and ARM templates adopted as building blocks across projects, **cutting provisioning time substantially**.
- Designed HA, DR and BCP solutions including multi-region failover; enforced security and compliance baselines through audits, vulnerability assessments and remediation.

KPMG Global Services (KGS)

Bengaluru, India

DevOps Engineer

Dec 2019 - Jul 2020

- Managed VMware vSphere/ESXi infrastructure - provisioning, snapshots, migrations and capacity planning; administered Windows Server and Active Directory.
- Supported on-premise VMware to Azure migrations and hybrid integration - VMs, storage, virtual networks and network security configurations.

Suzlon Group

Hyderabad, India

Cloud Operations Engineer

Jul 2017 - Sep 2019

- Provided L1/L2 infrastructure and application support - monitoring, incident resolution and user access management across Windows and Linux estates.
- Supported server and network operations - administration, patching, backups and documentation.

CERTIFICATIONS

- **AZ-400** - Microsoft Certified: DevOps Engineer Expert
- **AZ-104** - Microsoft Certified: Azure Administrator Associate

EDUCATION

MBA - Master of Business Administration, Acharya Nagarjuna University

June 2022
