

Platform Engineering | Cloud Architecture | DevSecOps | Kubernetes | Developer Platforms | Infrastructure Automation

PROFILE SUMMARY

- Platform Engineering Leadership:** Senior DevOps/SRE professional with 8+ years of experience designing and engineering scalable, secure, and highly available cloud platforms across Azure, AWS, GCP, hybrid, and on-premises environments.
- Cloud & Platform Architecture:** Strong expertise in architecting cloud-native platforms across AKS, EKS, GKE, Azure App Services, serverless, VM-based infrastructure, and enterprise hybrid environments, with focus on scalability, resilience, security, and governance.
- Internal Developer Platforms:** Experienced in building self-service engineering platforms using Backstage, Crossplane, Argo CD, and Kargo, enabling automated product and customer onboarding while reducing manual dependencies and accelerating developer productivity.
- Kubernetes & GitOps Engineering:** Hands-on expertise in Kubernetes platform engineering, GitOps, Helm, Kustomize, cluster upgrades, canary/blue-green deployments, autoscaling, and automated release management across multi-cluster environments.
- Infrastructure Automation & DevSecOps:** Proficient in Terraform, Bicep, ARM, Ansible, and Crossplane for reusable infrastructure provisioning, integrating security controls, identity, secrets management, vulnerability scanning, and compliance into engineering platforms.
- Reliability, Observability & FinOps:** Strong SRE foundation spanning SLI/SLO design, observability, incident management, resilience engineering, and performance optimization, complemented by FinOps practices that improve cloud cost visibility, governance, and predictability.

CORE COMPETENCIES

- | | | |
|---|------------------------------------|------------------------------------|
| Platform Engineering & Architecture | Cloud Platform Architecture | Internal Developer Platforms (IDP) |
| Kubernetes & Container Platforms | Cloud-Native Architecture | Infrastructure as Code (IaC) |
| GitOps & Continuous Delivery | DevSecOps & Cloud Security | SRE & Reliability Engineering |
| Observability & Performance Engineering | Platform Automation & Self-Service | Cloud Governance & FinOps |

TECHNICAL SKILLS

- Cloud Platforms:** Microsoft Azure, AWS, GCP, VMware vSphere/ESXi, Hyper-V
- Azure Services:** AKS, App Services, Azure Functions, Azure IaaS/PaaS, Azure Monitor, Key Vault, RBAC
- AWS Services:** EKS, EC2, S3, IAM, CloudWatch, CloudFormation
- Observability:** Dynatrace, Grafana, Prometheus, Azure Monitor, CloudWatch, ELK, Splunk, AppDynamics, Datadog, Zabbix
- SRE:** SLO, SLI, MTTR, RCA, Capacity Planning, Resilience Engineering, Canary Deployment, Blue/Green Deployment
- IaC & Automation:** Terraform, Ansible, Bicep, ARM Templates, Helm, CloudFormation
- Containers:** Kubernetes, AKS, EKS, GKE, Docker, Helm, Kustomize, OpenShift, ACR, ECR
- CI/CD & DevOps:** Azure DevOps, Jenkins, GitLab CI, GitHub Actions, Bitbucket, YAML Pipelines, GitOps
- Programming & Scripting:** Python, Bash, PowerShell, Shell Scripting, REST APIs, Azure CLI, AWS CLI
- DevSecOps:** Fortify, SonarQube, Black Duck, CodeDX, SAST, DAST, SCA, Container Scanning, Secrets Management
- Systems & Networking:** RHEL, Ubuntu, Active Directory, TCP/IP, HTTP/HTTPS, IPSec, VPN, DNS, Firewalls, Load Balancing
- ITSM & Methodologies:** ServiceNow, ITIL, Agile/Scrum, SAFe

WORK EXPERIENCE

- ADNOC – Abu Dhabi National Oil Company | Abu Dhabi, UAE | DevOps & Observability Engineer (Contractor) | May 2025 – Present
- Led **microservices modernization**, architecting and onboarding **200+ microservices** onto AKS through phased migration with zero downtime and zero user impact.
 - Championed **platform engineering** and Agile DevOps transformation, transitioning ADNOC from a legacy operations model to pipeline-driven product onboarding across Dev, UAT, and Production.
 - Built the **Azure DevOps platform** greenfield with governance frameworks and onboarding standards, enabling CI/CD and zero-touch deployments across VM, AKS, and App Services.
 - Designed reusable **YAML pipelines** with centralized governance and established Managed DevOps Pools (MDP) for application CI/CD alongside dedicated AKS-based self-hosted agent pools for shift-left source scanning.
 - Engineered reusable **DevSecOps pipelines** integrating Black Duck SCA, Fortify SAST/DAST, SonarQube, and CodeDX/SRM, with soft and hard SRM gates to block high-risk vulnerabilities before production.
 - Automated **agent monitoring** across **15+ group companies/Azure organizations** using Power Automate, eliminating recurring manual checks and reducing human error while improving platform reliability.
 - Drove **observability engineering** across AKS, Azure App Services, Azure Functions, Azure IaaS, VMs, and on-premises infrastructure using Dynatrace, Prometheus, Grafana, and Azure Monitor.

- Developed **Dynatrace automation** and Observability-as-Code solutions, including single-pipeline AKS auto-instrumentation with dynamic pod-level monitoring and automatic monitoring init-container injection; created dashboards, SLO/SLI instrumentation, metrics, logs, alerts, and incident-routing mechanisms.
- Automated **cloud provisioning** using Terraform, Ansible, Bicep, and ARM Templates across AKS, networking, identity, security, and Azure resources, while optimizing performance and cloud spend through right-sizing, autoscaling, storage lifecycle management, and ephemeral build environments.
- Led **L2/L3 support** covering incident response, RCA, problem management, and post-incident reviews, while strengthening governance through Managed Identities, RBAC, Azure Key Vault, RHEL, Hyper-V, Python, Bash, REST APIs, ServiceNow integrations, and standardized operational runbooks.

NTT DATA | Hyderabad, India | DevOps & Cloud Engineer | Oct 2020 – May 2025

- Delivered **cloud engineering and DevOps solutions** for enterprise customers across diverse industries, supporting Azure, AWS, GCP, hybrid cloud, and on-premises environments.
- Onboarded enterprise workloads to **Azure, AWS, and GCP**, establishing secure landing zones, IAM structures, networking baselines, VPN/Interconnect connectivity, and standardized cloud configurations.
- Designed, deployed, and administered **Azure IaaS and PaaS environments**, covering virtual machines, storage, networking, load balancing, security controls, and production/non-production infrastructure.
- Managed container platforms across **AKS, EKS, and GKE**, leveraging Kubernetes, Docker, Helm, and related orchestration technologies to improve deployment consistency, scalability, and platform reliability.
- Implemented enterprise **observability and monitoring frameworks** using Prometheus, Grafana, and cloud-native monitoring services across metrics, logs, application performance, and infrastructure health.
- Partnered with application and development teams to improve **microservices architectures, deployment workflows, release processes, and cross-environment integrations**, resolving infrastructure and application dependencies.
- Developed reusable **Terraform modules and ARM Templates** to standardize infrastructure provisioning and accelerate deployment across multiple customer environments.
- Executed **zero-downtime AKS upgrades** from **1.27 to the latest stable version** across control planes and VMSS-backed node pools within approved change-freeze windows, using max-surge rolling upgrades and PodDisruptionBudgets; validated CoreDNS, Azure CNI, and CSI driver compatibility to ensure zero user impact.
- Designed and supported **High Availability, Disaster Recovery, and Business Continuity solutions**, including multi-region resiliency, failover mechanisms, backup strategies, and recovery planning.
- Implemented and maintained **cloud security and compliance baselines**, supporting vulnerability assessments, remediation activities, security audits, and enterprise governance requirements.
- Automated repetitive infrastructure and operational activities using **Python, Bash, PowerShell, Azure CLI, and AWS CLI**, reducing manual intervention and improving operational efficiency.
- Supported troubleshooting and performance optimization across **cloud infrastructure, Kubernetes platforms, networking, operating systems, and application environments**.

KPMG | Bangalore, India | Systems Engineer | Dec 2019 – Jul 2020

- Managed **VMware vSphere/ESXi infrastructure**, including virtual machine provisioning, resource allocation, snapshots, migrations, capacity planning, and infrastructure performance monitoring.
- Administered **Windows Server environments**, handling user and system administration, patch management, backup operations, troubleshooting, and performance optimization.
- Supported **Microsoft Azure infrastructure** covering virtual machines, storage, virtual networks, and network security configurations.
- Managed **Active Directory** operations including user access, group policies, authentication, permissions, and security administration.
- Supported **on-premises to Azure cloud migration initiatives**, contributing to hybrid infrastructure integration, workload transition, connectivity, and post-migration support.

Suzlon Energy Ltd | India | Systems Engineer | Apr 2018 – Sep 2019

- Provided **L1/L2 infrastructure and application support**, handling system monitoring, incident resolution, troubleshooting, user access, and day-to-day IT operations.
- Supported **Windows and Linux server administration**, including system configuration, patching, backups, health monitoring, and issue resolution.
- Managed basic **network and infrastructure operations**, troubleshooting connectivity, system availability, and hardware/software-related issues.
- Administered **user accounts and access permissions**, supporting secure and timely access to enterprise applications and IT resources.
- Delivered **desktop and end-user support**, including hardware/software installation, operating system configuration, application troubleshooting, and technical issue resolution.

SOFT SKILLS

Negotiation & Conflict Management	Team Building & Interpersonal Skills
Analytical Problem Solving	Visionary and Decision Making
High Business Ethics	Leadership and Delegation

EDUCATION

- MBA – Acharya Nagarjuna University
